WORK EXPERIENCE

1990 - CURRENT - Sprang-Capelle, Netherlands

SD Educator, Manager, Guest lecturer

Niko Roorda Sustainability

Dr. Niko Roorda has been working for 30 years on integrating sustainable development into education and management: as a lecturer, curriculum developer, program manager, project manager, auditor, consultant and teacher trainer.

Roorda, a graduated theoretical physicist and philosopher of science, obtained his Ph.D. in social sciences in 2010, with key themes: sustainable development, organizational change and higher education. His contributions to sustainability science, in the form of ca. twenty books and dozens of chapters and articles, can be found via [Google Scholar](#) and [Researchgate](#). His citation index is: h-index=13; i10-index=17.

He worked as a manager in higher education institutions, as a board member of a school, and as a program and project manager in various organisations.

Examples of his presentations and online colleges can be found at his [website](#) and his [Youtube Channel](#). A good example of his work as a guest lecturer is his [Miami Lecture](#) (2017).

Contact information: <https://niko.roorda.nu/contact> and <https://www.linkedin.com/in/nikoroorda>.

1987 - CURRENT

Developer of education and management methods

Roorda developed and chaired:

- The first BSc program 'Sustainable Technology' in the whole world, within a University College in the Netherlands (1991-1998); first graduates: 1995.
- A pioneering program and a method to systemically integrate sustainable development (the 'Cirrus Project') into 13 BSc programs (1998-2003).
- [AISHE](#): Assessment Instrument for Sustainability in Higher Education, published in 2001 and since applied by hundreds of universities and colleges in more than 20 countries.
- AISHE 2.0: an expansion of AISHE, requested by many, available from 2008, in which besides the educational programs and the institution identity, also the research, the operations and the community outreach are assessed.
- A certification program on ESD (Education for Sustainable Development) for universities and colleges, which was formally recognized by the Dutch and Flemish Accreditation Organisation: a star system, through which hundreds of institutions have been certified and still are.
- A postgraduate education program on sustainable entrepreneurship.
- [FFEA](#), Future-Focused Entrepreneurship Assessment: a management instrument that is consistent with AISHE, but applicable in all kinds of organisations, such as: commercial companies; government organisations; hospitals; foundations and associations; etc.
- [RESFIA+D](#), also known as 'The 7 Competences of the Sustainable Professional'. This competence model is applied in organisations for their HRM and HRD; in universities and colleges for curriculum development; and by individual professionals and students.
- The [SD Curriculum Scan](#), a tool for a systematic analysis of the contents and the connections of SD aspects in curricula of universities and colleges,

enabling education teams to structurally improve their curricula and competence profiles.

2000 - CURRENT

● SD Consultant

- **Senior consultant:** for organizations, boards, managers and teams in a range of countries. Themes: sustainability, future focus, vision development, organization development, strategy & policy, CSR, education.
